Department of Health Assessment

Health in Your Hands

Regular health checks can bring priceless benefits to your health. A health assessment includes different tests and examinations which can give you an overview of your current health and look into the future by identifying your health risks.

With the advancement of medicine, if caught early, such chronic illnesses as heart diseases, diabetes and many cancers are treatable. Our health assessment teams are dedicated to advising you on health examinations that suit your needs. Examinations are carried out in one place and you will be able to discuss results/concerns with our experienced doctors.

Stay healthy and schedule a visit to HKSH health assessment team!
