Introduction

HKSH community nursing service provides holistic and continuous care and treatments to patients at home. Specialised and qualified nurses will conduct clinical assessments and carry out tailor-made care plans during home visits, allowing patients to receive treatments and recover in their home environment. As for complex cases, community nurses will discuss with and report to designated doctors when appropriate to ensure the best possible care to patients.

Objectives

- To deliver a coordinated healthcare service through the supporting network of HKSH Medical Group
- To empower patients and their caregivers towards self-reliance on disease management
- To promote primary health education

Target Patients

- Unable to attend the hospital or clinics due to health profiles
- In need of regular follow-up and monitoring at home
- In need of specialty care to enhance self-disease management

Services

General Care

- Tube care (e.g. Gastrostomy tube: PEG, nasogastric tubes, urinary catheters and central venous catheters)
- Wound care (e.g. Pressure injury ulcers, foot ulcer and fungating wounds)
- Drug administration (e.g. Intravenous injections)
- Specimen collection and testing (e.g. Blood taking)
- Home safety assessment and support

Specialty Care

- Geriatric care (e.g. Nutrition counselling and fall prevention education)
- Continence care (e.g. Bladder training, constipation care, removal of urinary catheter)
- Palliative care / End-of-life care
- Postnatal and infant care
- Surgical care (e.g. Post-surgical care, wound and drain care, ostomy care)

Chronic Disease Management

- Cardiac rehabilitation (e.g. Medication education, guidance on exercise and diet education)
- Pulmonary rehabilitation (e.g. Home ventilators and home oxygen therapy care)

- Diabetic care (e.g. Blood glucose monitoring and education on insulin injections)
- Stroke rehabilitation (e.g. Home safety assessment, guidance on exercise and diet)
- Renal care (e.g. Continuous Ambulatory Peritoneal Dialysis and Tenckhoff exit site care)
