Introduction

Hong Kong Sanatorium & Hospital offers tailor-made wound care services to patients through a robust, dedicated team of certified wound, ostomy and incontinence specialty nurses (Enterostomal Therapists). With the best interests of patients in mind, a holistic, integrated and multidisciplinary approach is adopted in our wound, ostomy and incontinence management to prevent wound formation, foster wound healing, provide pre/post-surgery stoma education and care, minimise post-surgery complications and improve skin conditions arising from incontinence.

Objectives

- Provide professional and high-quality wound care services for patients
- Enhance and promote knowledge of wound prevention and management in patients and their carers
- Provide pre-/post-surgery stoma education, prevent and manage post-surgery complications and enhance patients' confidence and competence in post-surgery self-care
- Provide tailor-made and effective wound, stoma and continence care predicated on the concept of holistic healthcare in collaboration with other specialists

Scope of Services

Wound Care

- Prevention and management of pressure injury for bed-bound patients
- Prevention and management of incontinence-associated skin breakdown and irritation
- Post-surgery wounds
- Cancerous wounds
- Leg and foot ulcers
- Trauma
- Burns and scalds

Ostomy Care

- Pre-surgery ostomy site marking and education
- Post-surgery ostomy care and education
- Ostomy, drain, tubing or ostomy-related skin irritation assessment and treatment
- Education on diet and daily care

Incontinence Care

- Prevention and management of incontinence-associated skin problems
- Fistula management
- Education on clean intermittent self-catheterisation
- Consultation service on incontinence care

Service Arrangement

Wound care service can be arranged via referrals by doctors. For more information, please contact our staff members.
